

We are currently looking for a Scientist (m/f/d) for our High Resolution Drug Screening (HRDS) project in Göttingen in fulltime

Your responsibilities:

- performs experimental research in our unit for cell biology located in Göttingen & Dortmund
- plans, performs, interprets and presents experiments to characterize new chemical and biological entities
- communication of results, study objectives and tasks within department as well as to collaborators staff members
- coordination and monitoring of technical work
- maintains and strengthens scientific expertise through conferences and training courses, literature and contacts to other research laboratories.

Your qualifications:

- PhD in Biology or a related field and have industry or postdoctoral experience
- experience with evaluation and interpretation of microscopic, large data sets
- experience in lab automation and microtiter plate-based assay technologies
- assay development and application of state-of-the-art methods for cellular assays to investigate cellular processes as well as mode of action of compounds
- sound know-how of drug discovery processes, particularly of cellular pharmacology
- flexibility, team spirit, drive and ambition
- demanding and challenging position in an interdisciplinary team of experienced and highly motivated researchers
- Willingness to be mobile for close exchange with our biology department in Dortmund

Your benefits:

- a temporary employment in Göttingen with the prospect of being taken on in Dortmund
- a flexible working hours model
- a friendly and respectful working atmosphere
- The opportunity to continually improve your skill set
- Company health management

As a member of our team, you will have a unique position as a link between academic and industrial research. Our goal is to contribute to the development of medicines that improve the lives of millions of people.

We believe that meaningful work is an important building block for a satisfied life. Cohesion, respect, flat hierarchies and an atmosphere conducive to innovation are among our core corporate values.
